

Use of Holmium Laser in Urology

One-day symposium

24th April 2015

Onze-Lieve-Vrouwclinic, Aalst, Belgium
Catharina Hospital, Eindhoven, Netherlands

The Department of Urology of the [Onze-Lieve-Vrouwclinic, Aalst](#) and the [Catharina Hospital, Eindhoven](#) would like to invite you for a joint symposium on the use of Holmium Laser in Urology. In this one-day course, applications of the Holmium laser in the treatment of Stones & Benign Prostatic Obstruction will be discussed.

The platform will be a [mix of live case surgery](#) and [practical lectures](#) on basic laser physics and clinical data. Our goal is to deliver some tips&tricks for those already working with a Holmium laser and to convince colleagues interested in starting a laser program.
